### **DETAILED ACTION**

1. Applicant's response filed on 03/06/2003 has been fully considered. Claims 11 and 12 are added, and claims 1 and 4-12 are pending.
2. Newly submitted claim 12 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The process for using the product as claimed can be practiced with another materially different product, (e.g., providing a heat sensitive stencil fabric comprising hydrophilic vinyl monomers graft-polymerized with cellulose fibers; feeding the heat sensitive stencil to a stencil printing apparatus; and conducting stencil printing with the stencil printing apparatus).
3. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 12 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
4. Upon further consideration the examiner is required to provide the following written Election of Species Requirement. The examiner will respond to Applicant's response filed on 03/06/2003 after an election has been made.

### ***Election/Restrictions***

5. This application contains claims directed to the following patentably distinct species of the claimed invention: A: Two-layered heat sensitive stencil sheet (claims 1 and 4-10); B: Three-layered heat sensitive stencil sheet (claim 11).

Art Unit: 1774

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 4-11 are generic.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

9. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1774

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
